---

We strongly recommend that all students studying 'A' level Biology, Chemistry or Physics purchase the CGP Revision guide to support their learning and provide them with an extra resource at home to aid with homework and revision. In the new 'A' level courses, 10% of the exam questions will examine their mathematical skills and therefore we are also recommending that students purchase the CGP revision guide, Essential Maths skills for the science that is being studied.

Please see the attached documents for further details
